

Your best BUDDY

With BUDDY your staff can omit extra steps. Attach the Eurodispenser 3 flex along your most efficient care route – for example at the patient bed or on your trolley.

What makes the dispenser so intuitive to use?

- Simply assemble it without tools
- Position it horizontally or vertically with a sliding clamp
- Rely on a robust stainless steel wire construction
- Choose between 500 ml and 1 L dispensers for different Euronorm bottles
- Autoclave it for thorough hygienic cleaning
- Optional drop catcher allows for clean applications without soiling the floor
- Facilitate your workflow by simply replacing the bottle when empty
- Attach it with 360° flexibility to patient beds, drip stands or trolleys
- Sterillium constantly travels with the patient bed – for example to the PACU

Earn your patients' trust

More dispensers

More smart and convenient hand disinfectant dispensers directly at the point of care – that's our mission.

More dispensers
-
More use of Sterillium

More use of Sterillium

Install the Eurodispenser 3 flex almost anywhere. Use more Sterillium when the dispenser is within arm's length.

More hand disinfection

Sterillium and a smart dispenser – the hygiene match. It's a scientific fact that proper hand hygiene aids in reducing infection.¹

More hand disinfection
-
More compliance

More compliance

The WHO demands compliance to the 5 moments of hand hygiene.¹ Sterillium works hand in hand with medical facilities to increase hand hygiene.

More confident staff

How do we boost the trust of caregivers? With a smart dispenser along the user care route.

More confident staff
-
More healthy patients

More healthy patients

What increases the trust of patients? Experiencing the care of staff when it comes to hand hygiene. The benefits: fewer infections and better health.

More positive word-of-mouth

Use hand hygiene compliance as a positive talking point. This can be a deciding factor to recommend your hospital.

More positive word-of-mouth
-
More patient retention

More patient retention

Patient retention is key. Content patients are more likely to return to your facility.

Patient safety first

Discover a smarter point of care

Introducing BUDDY, the Sterillium Eurodispenser 3 flex, and BUTLER, the Sterillium wall holder Plus

Hand hygiene can be so simple

The WHO hand hygiene moment 2 „before aseptic procedures“ is a top priority for patient safety.¹ Disinfectants ready within arm's length facilitate frequent use during staff working procedures. That's why we invented intuitive dispensers like BUDDY – they're always right next to you.

Apply
anywhere,
anytime.

¹ WHO Guidelines on Hand Hygiene in Health Care (2009)

Intuitive dispensers – ready to apply anywhere, anytime

More smart and convenient hand disinfectant dispensers directly at the point of care – that's the mission we want to accomplish hand in hand with you.

Install the Eurodispenser 3 flex nearly everywhere. At the patient bed or at the trolley. Use more Sterillium when the dispenser is within arm's length.

Apply
anywhere,
anytime.

Mount the
BUTLER on
any wall.

Your convenient BUTLER

Mount the newly designed Sterillium wall holder Plus almost everywhere in hospital rooms. The convenient BUTLER simplifies your hospital processes.

BUTLER is the perfect stationary companion to the mobile BUDDY.

A disinfectant holder you can rely on

- Mount it on any wall
- Dispenser firmly holds all standard 500 ml Euronorm bottles
- Optional drop catcher allows for clean applications without soiling the floor
- Use an easy to see and ergonomic dispenser
- Save space thanks to slim design
- Facilitate your workflow by simply replacing the bottle when empty
